

ROHAN PORJE

Product Designer & Design Technologist

+91-7875847229 rohanporje@zohomail.in linkedin.com/in/rohanporje/ Mumbai rohanporje.in

Summary

Product Designer with 6+ years of experience architecting end-to-end user experiences for complex, data dense enterprise and consumer platforms. Proven track record across 20+ client engagements in Automotive, E-Commerce, and Industrial B2B ecosystems driving up to 60% usability improvements and 80% first-round design approvals. Uniquely combines deep visual craft (Figma, tokenized design systems, WCAG 2.1 AA) with full-stack technical literacy (MERN Stack: React, Node.js, Tailwind, REST APIs) to build stateful prototypes, eliminate design-to-engineering rework, and accelerate product velocity.

Skills

Product Design & Prototyping

End-to-End Product Design | Wireframing | Information Architecture | Usability Testing |
Complex Dashboards & Data Visualization | Figma | WCAG 2.1/2.2 AA Accessibility Compliance

Development & AI Tools

HTML5 | CSS3/Tailwind CSS | React.js | Salesforce LWC | WordPress | Node.js | Express | MongoDB | REST APIs |
Git/GitLab | Prompt Engineering | Copilot Studio

Work Experience

Independent Product Designer & Design Technologist January 2026 - Present

Independent Product Designer & Design Technologist

- Designed the full user experience for client web and mobile products turning vague business requirements into clear user flows, polished prototypes, and reusable component libraries in Figma.
- Built interactive prototypes using the MERN stack (React, Node.js, Express) to mimic real API behaviour, helping validate complex interactions before handing designs off to engineering.
- Used AI tools like Cursor and Claude to speed up early-stage design work, turning ideas into clickable, testable prototypes in hours instead of days.

Software Developer UI/UX March 2023 - December 2025

TekZen Systems

- Designed and developed the official Jeep.com (US) UI using Figma, HTML, CSS, JavaScript, and React.js, delivering a responsive interface aligned with brand guidelines.
- Contributed to early branding and UI design for Carzato.com, building marketing materials and implementing the design in WordPress for a responsive, user-focused experience.
- Built the complete UI for ChryslerConnect.com from the ground up using HTML, CSS, React.js, working closely with the dev team.
- Resolved CSS and responsive design issues on E-shop, improving performance and consistency across devices.
- Designed and developed TekFutureSystems.com, delivering a responsive website aligned with brand and performance standards.
- Collaborated with users, developers, and QA to deliver high-quality features on time and within budget.
- Built Lightning web components based on client functional requirements.
- Wrote SQL queries in MariaDB to upload and update features across dealer websites.

UI/UX Manager June 2021 - October 2022

White Worldwide Agency

- Led UI/UX strategy and design execution across 10+ global brand accounts spanning ECommerce, EdTech, Energy, and Healthcare.
- Translated product visions into scalable designs by creating wireframes, prototypes, and high-fidelity mock-ups in Figma, ensuring alignment with user personas and business goals.
- Streamlined a creative team, overseeing resource planning, task distribution, and upskilling efforts to ensure consistent, high-quality delivery across projects.

Senior Graphic Designer

November 2020 - May 2021

Wisk

- Coded responsive HTML email templates and designed social media visuals for Facebook and Instagram, contributing to a campaign that drove 1000+ app downloads within a single week.
- Designed and deployed email campaigns via Mailchimp, achieving an average open rate of 35% and driving measurable engagement across promotional initiatives.
- Created 50+ social media creatives across platforms including Instagram and Facebook, maintaining consistent brand tonality and supporting audience growth of 13% over 3 months.

Senior Graphic Designer

March 2020 - October 2020

The Media Bulletin

- Designed daily e-newspaper layouts in Adobe Creative Suite, consistently meeting tight deadlines in a fast-paced media environment.
- Developed the company's brand guidelines from scratch (typography, colour palettes, visual standards) and built and maintained its WordPress website, keeping the identity consistent across digital and print communications.

Graphic Designer

July 2019 - February 2020

Hooterbux Ventures

- Led end-to-end branding and visual design for FMCG, real estate, and other clients, creating logos, colour palettes, brand materials, product packaging, and billboard visuals that stand out on store shelves and outdoor ads.
- Designed and built a Matrimony app prototype with simple, easy-to-use screens for matchmaking and profile browsing, and produced motion graphics for Edtech videos across all digital platforms.

Certification

MERN Stack

- TuteDude

User Experience Design Essentials

- Adobe XD (Udemy)

Power BI Essentials

- Udemy

Multimedia Designing

- MAAC Institute of Design

Education

Bachelors of Electrical Engineering

Jun 2013 - 2019

KVN Naik College of Engineering
